

MACHINE DESIGNER / DRAFTSPERSON

Sepro Mineral Systems Corp. is a rapidly expanding Canadian Company (Langley, British Columbia) operating internationally in the mining, metals, and construction aggregates industries. Sepro's core business for the last 20+ years has been the supply of mineral processing equipment, metallurgical testing and process consulting. Services range from evaluative studies through equipment design, fabrication and commissioning.

An unprecedented demand in these services has resulted in an opening in our engineering department. We immediately require a F/T permanent Machine Designer / Draftsperson:

Duties:

- Design and model Sepro equipment in Solidworks
- Produce detailed manufacturing drawings
- Work with document management and ERP systems

Education / Experience:

- Mechanical Technologist or equivalent with 5+ years design experience
- Solidworks
- AutoCAD

The ideal candidate possesses the following assets:

- Excellent spoken and written command of English language
- Mineral processing machinery design experience
- Strong mechanical aptitude
- Excellent computer literacy

Sepro provides a dynamic, challenging and enjoyable environment with excellent working conditions and benefits.
